

Looking at British Columbia

Try This:

- Click on the "Zoom to" drop-down menu and select "British Columbia."

Notice ...

- The Alaska Panhandle boundary line with British Columbia follows the transition from the Pacific Forest province to the Cordilleran Boreal province.
- The southern half of the British Columbia - Alberta provincial border matches closely the boundary between the Cool Temperate and Boreal Divisions.

Consider!

- Ecological rules may prevail, even in the face of simple geometry, for establishing political boundary lines in remote areas.
